

## Airmate Professional P5.5/200 Compressor

This 415v three-phase oil lubricated compressor utilises an extra-hard wearing pump that runs slower than usual for extended life and resistance to wear and tear. Designed with an oversized crankcase for improved lubrication. the machine comes fitted with a strong plastic belt guard that protects the operator from injury. Featuring a multi-finned flywheel for improved cooling, the machine serves a 200 litre air receiver from a piston displacement of 23.0cfm to offer an FAD of 17.3cfm and output of 10 bar (145psi). Enabling complete mobility.

- DIMENSIONS 980 x 550 x 1510mm
- WEIGHT 102.00 kg
- Maximum Pressure 10 Bar
- FAD 17.3cfm
- Multi-Finned Flywheel for Improved Cooling
- 200 Litre Air Receiver Tank
