

Tric M50 System

The TRIC M50 is the perfect combination of size and power for those easements and other tight spots where bigger equipment just won't fit. Strong enough to burst up to 250mm, yet compact enough to set up by hand. TRIC Tools Inc. invented the first sewer lateral pipe bursting system in 1996, opening the market for trenchless home sewer replacement. TRIC's lightweight compact design means that the equipment can be used where conventional pipe bursters just cannot fit. Small enough to be used in manholes and having the power to deliver without the need to dismantle and re-assemble making these tools the first choice for confined space working as well as large diameter projects. Benefits of the TRIC Cable Bursting Systems:

- Strength & Reliability
- Safer Working Environment
- Minimum Setup Required
- Finance Available

Specifications

Pulling Force	48 tons @ 5000 psi
Puller Weight	61 kg
Puller Dimensions	229 x 245 x 965 mm
Max Pipe dia Burst	250 mm
